

About Us

We started our business in 1982 by marketing world famous Italiana Burdizzo Castrators and were appointed as their Sole Agents for India in 1985. Gradually we started adding more Veterinary Equipments and Surgical Instruments to cater to the needs of Veterinary Hospitals all over India.

In 1986, we entered the upcoming field of Frozen Semen Technology and Embryo Transfer and started selling indigenously manufactured A. I. Consumables and other products required in a Frozen Semen Bull Station. In 2012, we set up our own manufacturing facility and started producing A.I. Sheaths, A.I. Guns, Disposable Insemination Gloves, Plastic Goblets, Artificial Vaginas, A.V. Silicone Cones, Dipsticks for measuring LN2, Aprons, A.I. Kit Bags, Cryojar Bags. Besides, we are also trading in Veterinary Instruments like Scissors, Straw Holding Forceps, Goblet Holding Forceps, Kidney Trays, Aluminium Goblets, Thermos Flasks, LN2 Transfer Device manually operated, Thawing Units and Digital A.I. Guns etc.

In 2016, we got associated with M/s Minitube Germany for marketing their high State-of-the-Art Cryogenic Systems for Advanced Animal Reproductive Technology to State Livestock Development Agencies/Boards all over India.

With a strong commitment to the veterinary industry, research and development remains a continuous process for us, driving innovation and enabling us to create reliable, quality solutions.
